Am I ready to be a coach?

Do I need prior experience with robotics?

No experience or knowledge necessary! Our coaches training is designed to make sure that no matter your background, you will leave feeling confident and ready to guide your team(s) through the season!

What does the Season look like?

Seasons start in September and finish between February and June. Teams meet between 1-3 times each week, using program provided curriculum to guide discussion and activities. As a coach, your role is to encourage exploration and troubleshooting with your teams.

Can my team be co-ed?

Yes! You can have a team based out of your school, your church, or community. Girl Scouts are champions of girls; if your team is co-ed, please ensure 50% or more of participants are female.

How do I register and get started?

Visit gsnetx.org/robotics for more information and to find instructions on how to register your team!
